

With over 25 years experience of racing prize winning classic cars, JC Restorations has gained a vast knowledge of building and setting up race cars, needed to compete at the high level end of classic car racing.

We have an extensive knowledge on and off the track, with the V8 racing engine for the Sunbeam Tiger classic car, due to our close association with [Knight Racing Services](#) , the premier V8 engine manufacturer in England today. Also we work closely with

[Andy Rouse](#)

, 6 times British touring car champion, who can test and help set up the car under racing conditions.

Other race car services include:

-

Suspension Work

-

Engine Services : done in house on small engines

-

Gear boxes

-

Rear ends

-

Brakes

We can also provide a rolling road, Dyno and mapping service on request.
